DHEERAJ KJ

Bengaluru, Karnataka, 560026

+91-8453388538 dheerajkondan@gmail.com linkedin.com/in/Dheeraj-kondan855a3927a https://github.com/DheerajKondan/

Education

Bangalore Institute of Technology **Jun 2025**

Bachelor of Engineering in Information Science and Engineering- (CGPA: 8.22) *Bengaluru, Karnataka*

PVP Polytechnic **Sept 2022**

Diploma in Information Science and Technology- (Percentage: 82.24) *Bengaluru, Karnataka*

Internship

Prinston Smart Engineers | October 2023 - November 2023

Data Science Intern

- Participated in the design and development of data-driven models and analytics.
- Utilized programming languages and tools such as Python, and machine learning libraries to implement data models.

Bharat Intern | January 2024 - February 2024

Data Science Intern

- Completed assigned tasks within stipulated deadlines, demonstrating strong time management and organizational skills.

Py-Spiders | April 2025 – July 2025

Data Analytics Intern

- Completed intensive, hands-on training in Python, SQL, Power BI, Pandas, and NumPy.
- Involved in solving practical tasks and mini-projects designed to simulate real-world data analytics scenarios.
- Gained experience in data wrangling, analysis, and dashboard creation with industry-standard tools.

Projects

Respiratory Disease Classification Using Machine Learning

- Developed a deep learning model using Convolutional Neural Networks (CNN) to classify respiratory sounds such as wheezes and crackles for early detection of lung diseases.
- Preprocessed audio data and transformed it into Mel-spectrograms for effective feature extraction and training.
- Achieved high classification accuracy by implementing and fine-tuning the CNN model using TensorFlow and Keras frameworks.

OTT Platform Content Analytics Dashboard using Power BI **GitHub**

- Built an end-to-end Power BI analytics dashboard to analyze OTT platform content from Netflix, Amazon Prime, and Disney+ Hotstar, covering 20K+ titles.
- Performed data transformation in Power Query, including normalization of multi-value fields (Genre, Country) and removal of inconsistencies to ensure clean and structured data.
- Developed DAX measures and KPIs to analyze content distribution, movie vs TV show ratio, and platform-wise content trends.
- Created interactive visualizations and slicers to explore genre popularity, rating categories, duration patterns, and yearly release growth.
- Implemented navigation-driven dashboards with platform-specific pages for enhanced storytelling and user experience.

Salary Prediction using Data Science and Machine learning **GitHub**

- Developed a predictive model to estimate potential salaries based on job description and applicant profiles.

Bitcoin Price Movement Prediction **GitHub**

- Analyzed historical Bitcoin data, using python libraries and machine learning models to predict price movements; performed data preprocessing, feature scaling, model esvaluation and data visualization of trends.

Technical Skills

Languages: Python, SQL
Developer Tools: VS Code, Eclipse, Google Colab
Technologies/Frameworks: GitHub
Skills: Data Science, Machine Learning, Power BI
Soft skills: Communication, Time management, Problem solving, Teamwork
